

# ABOUT DADEN

Daden specialise in immersive learning and training systems, building visualisations and creating interactive virtual assistants [chatbots]. Our virtual world and chatbot based solutions help organisations enhance and improve their business. Our clients range from the private sector to central and local government, education, public safety, health and care within the UK and abroad.

## BUILDING VISUALISATION

- Virtual 3D copies of proposed and existing builds
- Modify, explore and view 24/7, and capture comments
- Explore as individuals or as groups, with your own avatar
- Support consultation, planning training and management
- Understand the social aspects of the build
- Build at any scale and show building related data

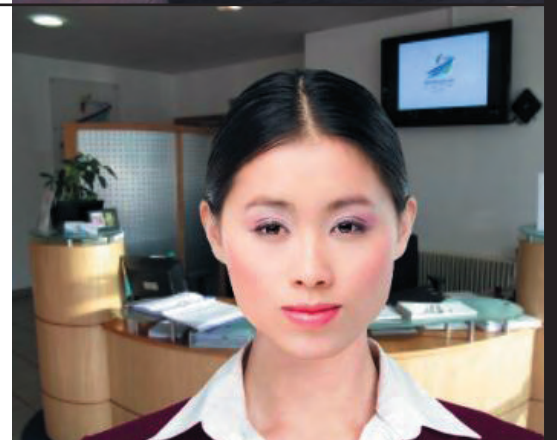

## TRAINING AND EDUCATION

- Immersive 3D simulations and learning spaces
- Deliver student education and employee training
- Capture performance data and manage from the web
- Increase understanding and retention
- Save time and cost through remote learning
- Safe spaces for simulations or scenario based learning

## VIRTUAL CHARACTERS

- Answer questions about you, your products and services
- Conduct surveys and access live data systems
- Help users find answers quickly and capture questions
- Reduce demands on staff and contact centres
- Increase sales, visits, referrals and trust
- Deploy on the web or in a virtual world
